

### 3 REMARKS

6 Claim has been amended to recite a "pancake shaped" inner container having a "pancake  
7 shaped" cavity. Support for this change is found in the drawings.

8           Applicant proposes a more definite claim of the invention, wherein the various cavities  
9 and difficulties in determining the “inside” and “outside” of the various parts are more explicitly  
10 described in the claims. Applicant states that the prior art cited of Fay or Goto did not cite an  
11 inner casement having cylindrical walls, where the cylindrical walls had holes drilled, the holes  
12 acting as nozzles to direct jets into the cavity of the inner casement. Applicant states that prior  
13 art of Goto had holes in the liners, and that a nozzle was inserted into the hole from outside the  
14 outer casing of Goto.

15 No additional fee is required. The required fees and any insufficiency or overage  
16 (except issue fees) may be debited or credited to deposit account 08/2240. A signed deposit  
17 account authorization is on file for this case.

18 On the basis of the above amendments and remarks, reconsideration of this application  
19 and its early allowance is respectfully requested.
